

Eden Local Agenda 21 Cumbria Green Build Fortnight 2007

© Eden Local Agenda 21. All rights reserved.

Eco-op Ltd.

Interested in all types of work to clean up contamination / pollution. All work is based on the most sustainable solutions.

Green Build Fortnight 2007:

Richard Henry of Eco-op gave a guided tour around a reed bed system he had designed and installed at Dale Foot Farm, Helton. He demonstrated how to design & install a reed bed system, which would be appropriate for domestic, farm or industrial sites.

Principal Sustainability Product:

Waste Water Treatment Systems including: Reed beds, Wet Woodlands & balancing ponds.

Can do either design, or design & build – happy to give advice and liaise with Environment Agency.

Other environmental mitigation work:

Frog / newt tunnels across main highways, with both the Highways Agency and highways contractor AmeyMouchel.

Environmental and water treatment works for regional landowners, farmers and estate owners.

Area covered:

North West England.
